Latex Foley Balloon Catheter

MID HEALTH Disposable Infusion Set is mainly made from three parts (flow regulator , medical filter, and stopper spike), with needle, it is used to infusion, composed of Luer lock hub and Y port injection , filter with plastic chamber, intravenous administration set, Sterile by Ethylene Oxide Gas, Non toxic and Non Pyrogenic,Tube soft PVC and Length 150cm,air vented Spike with cap and can be used for pediatric and adult.

Suction Connecting Tube

MID HEALTH Suction Connecting Tubes mainly serves as the conduit from suction instruments and tubes to evacuate fluid and debris into the suction waste collection canister and source. All Tubes are manufactured from medical grade PVC, which is flexible, durable, and kink resistant, and have minimal coil memory to prevent kinking and twisting. The Suction tubing is composed of tube and connector, and is divided into reinforced suction tubing and elastic suction tubing according to the characteristic of tube,tube length 3M, anti kinking tube, universal connector, medical grade PVC, kresion material for yaunker handles, and EO Sterilization. This product is used in suction or drainage such as body pleural effusion, or as a tube in the connection of in vitro.

Disposable Infusion Set

MID HEALTH Latex Foley Balloon Catheter is an indwelling urinary catheter. Named for Frederic Foley, the surgeon who first designed the catheter, the Foley is a hollow, flexible tube that is inserted into the bladder through the urethra. The Latex Foley Balloon Catheter is composed of Plastic valve (hard valve), 2 Way / 6FR - 26 FR dia, 3 Way 16FR - 24FR, 100% silicone coated, smooth surface, thickened catheter tail, with perfect latex balloon, capacity balloon 3ml - 80ml, large diameters maximize urine flow, and no balloon burst or leakage after being dipped inside artificial urine for 7 days.

" เชื่อว่าพรุ่งนี้จะดีกว่า ขอบคุณพระเจ้าเสมอและขอบคุณ "

Percaya Bawa Hari Esok Akan Lebih Baik.
Selalu Bersyukur Kepada Tuhan Dan Berterimakasih
